0M4 Benton County Airport

Aviation Moves Tennessee

Tennessee's aviation system has 76 public-use airports that support a wide range of activities, from commercial airline travel to private aircraft operations. Aviation contributes approximately 9% of Tennessee's gross domestic product (GDP) and generates an estimated $53.8 billion in total economic impact across the state. To better understand how these airports support Tennessee's economy, the Tennessee Department of Transportation (TDOT) Aeronautics Division conducted an updated Aviation Economic Impact Study.

About Benton County Airport

Located in northwest Tennessee, just south of the City of Camden and near the Tennessee River, Benton County Airport (0M4) serves as a key aviation gateway for a largely rural and scenic region. The airport is surrounded by rolling farmland, wooded areas, and waterways that define Benton County's landscape and support travel and recreation.

The county-owned airport features a 5,001-foot runway capable of supporting a wide range of general aviation activities, including recreational flying, flight training, and corporate travel. This capability is particularly important in a rural setting, where aviation access enhances connectivity, reduces travel time to and from the region, and supports regional economic activity.

Magic Valley Aircraft, one of the airport's on-site tenants, supports day-to-day aviation activity by providing flight training services. Waste Management and Air Evac also utilize the airport to support operational and transportation needs.

To better understand the geographic reach of Benton County Airport, the map below shows a selection of flights that operated both into and out of the airport.
