2A1 Jamestown Municipal Airport

Aviation Moves Tennessee

Tennessee's aviation system has 76 public-use airports that support a wide range of activities, from commercial airline travel to private aircraft operations. Aviation contributes approximately 9% of Tennessee's gross domestic product (GDP) and generates an estimated $53.8 billion in total economic impact across the state. To better understand how these airports support Tennessee's economy, the Tennessee Department of Transportation (TDOT) Aeronautics Division conducted an updated Aviation Economic Impact Study.

About Jamestown Municipal Airport

Serving the City of Jamestown and surrounding communities in Fentress County on the Cumberland Plateau, Jamestown Municipal Airport (2A1) provides general aviation access within a largely rural area characterized by small towns, open land, and local industry. The airport functions as a community aviation facility that accommodates business travel, meetings, and regional mobility where air transportation supplements surface travel.

Jamestown Municipal Airport is a publicly owned, public-use general aviation facility featuring a 3,498-foot runway. The runway length supports light general aviation aircraft and short-range business operations, making the airport suitable for small business travel, local aviation use, and regional accessibility.

While on-airport commercial development is limited, Jamestown Municipal Airport is used regularly by several off-airport businesses that rely on aviation access. Kauffman's Gazebos, a construction company specializing in gazebo manufacturing, conducts business trips through the airport and utilizes the terminal for meetings. LPS Equipment & Acquisition also utilizes the airport frequently to support equipment sales and auction travel throughout the country.

To better understand the geographic reach of Jamestown Municipal Airport, the map below shows a selection of flights that operated both into and out of the airport.
