DYR Dyersburg Regional Airport

Aviation Moves Tennessee

Tennessee's aviation system has 76 public-use airports that support a wide range of activities, from commercial airline travel to private aircraft operations. Aviation contributes approximately 9% of Tennessee's gross domestic product (GDP) and generates an estimated $53.8 billion in total economic impact across the state. To better understand how these airports support Tennessee's economy, the Tennessee Department of Transportation (TDOT) Aeronautics Division conducted an updated Aviation Economic Impact Study.

About Dyersburg Regional Airport

Supporting the City of Dyersburg and surrounding areas of Dyer County in northwest Tennessee, Dyersburg Regional Airport (DYR) provides general aviation access within a largely rural region characterized by open land, small communities, and agricultural activity. The airport serves as an important transportation asset for local businesses, visitors, and residents by offering air access in an area where travel options may otherwise be limited.

Dyersburg Regional Airport is a publicly owned, public-use general aviation facility featuring a 5,698-foot runway capable of accommodating a variety of general aviation aircraft, including business and corporate operations. The runway length supports flexible operations for locally based aircraft as well as visiting users while enhancing regional connectivity and business travel.

Several aviation-related tenants operate directly on-airport. The City of Dyersburg operates the airport's fixed-base operations (FBO), providing essential services that support visiting and based aircraft. In addition, Hertz maintains an on-airport presence, offering rental car services that enhance ground transportation options for pilots, passengers, and business travelers.

To better understand the geographic reach of Dyersburg Regional Airport, the map below shows a selection of flights that operated both into and out of the airport.
