JWN John C Tune Airport

Aviation Moves Tennessee

Tennessee's aviation system has 76 public-use airports that support a wide range of activities, from commercial airline travel to private aircraft operations. Aviation contributes approximately 9% of Tennessee's gross domestic product (GDP) and generates an estimated $53.8 billion in total economic impact across the state. To better understand how these airports support Tennessee's economy, the Tennessee Department of Transportation (TDOT) Aeronautics Division conducted an updated Aviation Economic Impact Study.

About John C Tune Airport

Serving the western portion of the Nashville metropolitan area in Davidson County, John C. Tune Airport (JWN) provides general aviation access within an urban setting influenced by commercial development, business activity, and nearby residential areas. The airport functions as an important reliever facility for Nashville International Airport and plays a key role in accommodating business, recreational, and specialty aviation activity within the region.

John C. Tune Airport is a publicly owned, public-use general aviation airport featuring a 6,001-foot runway capable of accommodating a wide range of general aviation aircraft, including business jets and specialized operations. The runway length and associated infrastructure enable the airport to support corporate aviation, charter flights, and training operations while enhancing regional accessibility.

Numerous aviation-related businesses operate directly on-airport. Among these tenants, Contour Flight Support provides fixed-base operator (FBO) services supporting based and visiting aircraft. In addition, Go Skydive Nashville operates on-field, conducting parachuting and recreational aviation activities.

To better understand the geographic reach of John C. Tune Airport, the map below shows a selection of flights that operated both into and out of the airport.
