M53 Humboldt Municipal Airport

Aviation Moves Tennessee

Tennessee's aviation system has 76 public-use airports that support a wide range of activities, from commercial airline travel to private aircraft operations. Aviation contributes approximately 9% of Tennessee's gross domestic product (GDP) and generates an estimated $53.8 billion in total economic impact across the state. To better understand how these airports support Tennessee's economy, the Tennessee Department of Transportation (TDOT) Aeronautics Division conducted an updated Aviation Economic Impact Study.

About Humboldt Municipal Airport

Located in the City of Humboldt and surrounding areas of Gibson County in West Tennessee, Humboldt Municipal Airport (M53) provides general aviation access within a largely rural area characterized by agricultural land, small communities, and local industry. The airport functions as a community aviation resource for public-service operations, business travel, and general aviation activity in a region where air transportation complements surface travel.

Humboldt Municipal Airport is a publicly owned, public-use general aviation facility featuring a 4,003-foot runway. The runway length supports light general aviation aircraft, emergency response flights, and local aviation activity, making the airport well suited for public-service and community-focused aviation operations.

Several aviation-related operations are based directly on-airport. Vanderbilt LifeFlight 8, operated by Air Methods, maintains a presence conducting emergency medical response operations that contribute to regional public safety. In addition, Mike Chase Mechanic provides aircraft maintenance services supporting both based and visiting aircraft.

To better understand the geographic reach of Humboldt Municipal Airport, the map below shows a selection of flights that operated both into and out of the airport.
