M54 Lebanon Municipal Airport

Aviation Moves Tennessee

Tennessee's aviation system has 76 public-use airports that support a wide range of activities, from commercial airline travel to private aircraft operations. Aviation contributes approximately 9% of Tennessee's gross domestic product (GDP) and generates an estimated $53.8 billion in total economic impact across the state. To better understand how these airports support Tennessee's economy, the Tennessee Department of Transportation (TDOT) Aeronautics Division conducted an updated Aviation Economic Impact Study.

About Lebanon Municipal Airport

Serving the City of Lebanon and surrounding areas of Wilson County in Middle Tennessee, Lebanon Municipal Airport (M54) provides general aviation access within a region that includes healthcare services, professional uses, and educational institutions. The airport functions as a local aviation facility for medical flights, business travel, and workforce mobility in an area where air transportation complements surface travel.

Lebanon Municipal Airport is a publicly owned, public-use general aviation facility featuring a 5,000-foot runway capable of accommodating a variety of general aviation aircraft, including medical helicopters and business aircraft. The runway length and supporting infrastructure allow the airport to accommodate emergency response missions and routine general aviation operations while enhancing regional accessibility.

Several aviation-related organizations operate directly on-airport. Vanderbilt LifeFlight, operated in conjunction with Metro Aviation, maintains an on-airport presence providing helicopter emergency medical transport services. In addition to on-airport activity, Southeast Anesthesiology and the Baker School of Aeronautics utilize the airport to support medical, professional, and aviation-related travel.

To better understand the geographic reach of Lebanon Municipal Airport, the map below shows a selection of flights that operated both into and out of the airport.
