TGC Gibson County Airport

Aviation Moves Tennessee

Tennessee's aviation system has 76 public-use airports that support a wide range of activities, from commercial airline travel to private aircraft operations. Aviation contributes approximately 9% of Tennessee's gross domestic product (GDP) and generates an estimated $53.8 billion in total economic impact across the state. To better understand how these airports support Tennessee's economy, the Tennessee Department of Transportation (TDOT) Aeronautics Division conducted an updated Aviation Economic Impact Study.

About Gibson County Airport

Located in the City of Trenton and surrounding areas of Gibson County in northwest Tennessee, Gibson County Airport (TGC) provides general aviation access within a largely rural area characterized by agricultural land, open countryside, and small communities. The airport functions as a local aviation resource for business travel, aviation services, and regional mobility in an area where air transportation supports surface travel.

Gibson County Airport is a publicly owned, public-use general aviation facility featuring a 4,802-foot runway capable of accommodating a variety of general aviation aircraft. The runway length supports business aviation, light manufacturing-related operations, and visiting general aviation activity while enhancing regional accessibility.

An aviation-related business operates directly on-airport. Airframes, Inc. maintains a presence providing aviation-related manufacturing and repair services that support specialized aircraft operations and aviation activity at the airport.

To better understand the geographic reach of Gibson County Airport, the map below shows a selection of flights that operated both into and out of the airport.
